

PROJECT PROFILE

Project: Aeration tanks waterproofing and protection, using Cem-Kote Flex CR, Lagoon Lane (Muskoka), Ontario, Canada

Designer: CH2MHill

Contractor: JDCMI, Ontario

Gemite products: **Cem-Kote Flex CR and the Reinforcing Fabric HD**

Objective: waterproofing and H₂S protection of interior concrete walls of aeration tanks in the Lagoon Lake – Muskoka wastewater treatment facility. The surface was cleaned by high pressure wash, 5,000 psi and **Cem-Kote Flex CR and the Reinforcing Fabric HD** was hand applied in two coats, to total thickness of 2 mm. The project was carried out in 2010. Note the treatment of horizontal and vertical corners with coves reinforced with the Reinforcing Fabric HD.
