

PROJECT PROFILE

Project: Aeration tanks waterproofing and protection,
Rockland, Ontario, Canada

Designer: Ontario Clean Water Agency, Ontario

Contractor: Memtek, Ottawa

Gemite products: **Cem-Kote Flex CR**

Objective: waterproofing and H₂S protection of interior concrete walls of aeration tanks in the Rockland wastewater treatment facility. The surface was cleaned by high pressure wash, 5,000 psi and **Cem-Kote Flex CR** was hand applied and brushed, in two coats, to total thickness of 1.6-2 mm. The project was carried out in 2010 and 2011. Additional tanks will be done in 2012 and the project will be completed.
