

Carbon Fibre Structural Reinforcement Products and Applications

Concrete repair and structural reinforcement

Product	Description and Use
Fibre-Prime	Brush applied, cement based, corrosion protective coating containing migrating corrosion inhibitor. It is used to protect exposed reinforcing steel.
Fibre-Patch OV	Hand applied, fast setting fibre reinforced, micro-silica enhanced structural waterproofing mortar for application on horizontal, vertical and overhead surfaces. Also used in grouting types of concrete repairs.
Gem-Plast TC	Repair mortar used in thin section, feather edge to 12 mm (up to ½ in) surface repair of reinforced concrete. Hand or machine applied.
Spray-Con WS ST	Spray-applied, fibre reinforced, micro-silica enhanced wet process shotcrete for large volume structural rehabilitation and reprofiling.
Gem-Gard MCI	Deep penetrating migrating corrosion inhibitor, provides corrosion protection of reinforcing steel
Gem-Cote W ST Primer	An epoxy primer for use Gem-Cote W ST Resin in application of Gem-Wrap CF – carbon fibre fabric (wrap)
Gem-Cote W ST Resin	An epoxy resin used as adhesive with Gem-Wrap CF
Gem-Cote S ST Adhesive	An epoxy resin adhesive, used with Gem-Strip, the pre-formed, reinforcing carbon fibre strip
Gem-Strip CL	Carbon Laminate strip used in structural reinforcement
Gem- Wrap CF	Carbon fabrics of different weights, used in structural reinforcement
Cem-Kote Barrier Cote 100	Waterproofing and Vapour retarder used before applying epoxy adhesives, to prevent debonding due to water, or water vapour coming from behind the concrete layer (reinforcement of underground concrete structures)

Structure protection/waterproofing

Product	Description and Use
Tuff-Flex CA	A highly flexible, crack bridging, colored coating. Used mainly in restoration projects but also in new construction to provide low temperature crack bridging protection against water, chloride, carbon dioxide and oxygen intrusion.
Primer # 300	Primer # 300 is used as a primer for Tuff-Flex CA, but can also be used as a protective, color finish
Rain-Shield Stain OP WB	Water-based acrylic color opaque stain that provides long-term protection of concrete against penetration of water and chlorides
Gem-Gard SL ST	A hydrophobic silane, 100% active solids, penetrating sealer used in protection of concrete decks against penetration of salt and water. It also increases a freeze /thaw resistance of concrete.
Cem-Kote ST	Polymer modified cement damp-proofing coating, with superior durability and longevity
Cem-Kote Flex ST (Plus)	Highly flexible polymer modified cement coating, provides crack bridging and superior long-term water proofing and protection of concrete bridge structures. Typically sprayed applied.
Rain-Shield MC 100	Penetrating, acrylic, water borne, clear coating, based on novel Nanotechnology.
Gem-Gard MCI	Deep penetrating migrating corrosion inhibitor, provides corrosion protection of reinforcing steel.

All accessory products and manufactured and supplied by Gemite Products Inc.

GEMITE INNOVATIVE GLOBAL CENTRE

Gemite draws upon many decades of a practical experience to assist the Architect, Engineer and Contractor to find the most Efficient and Permanent Solution. From the Condition Analysis of existing structures, to continuous support during the Design and Specification process, we provide advice to assure that the best and cost efficient systems are selected.

Worldwide Technology Leader

Our continuous Innovation, Superior Quality and Solid Reputation make Gemite the preferred industry choice for lasting and reliable solutions. The latest technology introduced by Gemite is a Nano group of products.

14

15

16

Established and Field Proven Technology

Gemite material systems have been used in new construction and restoration projects ranging from small to huge. We have an international track record of successful installations for over 25 years around the globe, from the ravages of Sahara to the colds of Alaska.

Global Availability and Support

Gemite materials are available internationally, ensuring consistent quality and service to customers everywhere. Gemite guarantees a Single Source of Environmentally Responsible Materials, applied by well-trained Professional Applicators, and supported by a Global Technical Network.

17

LEED, Green and Safe

Gemite supports LEED Green concept and strives to maximize sustainability and environmental health by using materials with the lowest possible carbon footprint. Gemite's constant improvement of operating procedures and strict Quality Control according to its ISO 9001 Certification assures that we deliver materials with consistent quality and performance to our global Customers.

Brochures for following markets are available on request:

- Water treatment
- Wastewater treatment
- Crystalline waterproofing
- Bridges
- Parking garages
- Wall and roof coatings
- Industrial concrete
- Dams and locks
- Tunnels
- Marine structures
- Cooling towers
- Airports
- Chemical protection of concrete
- Carbon Fibre Reinforcement
- Sewers and manholes
